

YANMAR

MIDI EXCAVATOR

SV60

Operating weight	5 635 kg
Engine gross power	33.4 kW / 44.8 HP at 2200 rpm
Digging force (arm)	27.3 kN
Digging force (bucket)	41.9 kN

Welcome into the Yanmar business class

COMPACTNESS

The SV60 has been designed to meet all your requirement and this while executing the most complicated jobs. Compact and lightweight, this 5.6 t machine has a working envelope of only 3565 mm. Its stability and power enable it to work effectively regardless of the difficulty of your jobsite. The SV60 is intended for a wide range of applications such as urban renewal, grading or landscaping.

POWERFUL YANMAR ENGINE

Latest version of Yanmar TNV engines: turbocharged 4-cylinder engine with direct injection to improve performance, fuel consumption and emission levels. Autodeceleration and Eco-mode are available in standard.

VIPPS HYDRAULIC SYSTEM

The SV60 is equipped with a ViPPS hydraulic system which cumulates the flow of separate pumps in order to obtain the optimal combination in terms of speed, power, smoothness and balance to allow smooth and simultaneous performance of all the operations, even while traveling

EXCELLENT STABILITY

Robust X-frame design of the undercarriage, ideal weight distribution, short rear overhang: impressive level of stability.

HIGH PERFORMANCE

High performance of the powerline components (engine, hydraulic pump, control valve): this will allow Yanmar customers to perform heavy-duty jobs in confined spaces.

SPACIOUS AND COMFORTABLE CABINE

The SV60 benefits from the widest cabin of its category and a special attention has been to the design of the operator station: increased leg room, Yanmar "Universal Design" for an enhanced comfort and productivity, new electronic instrumentation, improved ergonomics and air suspension seat and rearview camera in standard.

EASY OPERATION

Control levers ideally placed for exceptional movement precision. All the main commands are located on the joysticks for a maximum manoeuvrability and productivity.

BEST COMPONENTS

Developed in Japan with renowned components for top quality. Design and performance of the components made for long service life.

EASE OF MAINTENANCE

5 hoods or openings which allow easy access for components maintenance. Fast and easy daily checks or servicing.

COMPACTNESS

A true concentrate of technology and innovation, the SV60 offers the performance of a midi-excavator while enjoying the benefits of a compact excavator. Designed to work effectively on a wide variety of sites, it combines compactness, power, versatility, comfort and reliability.

IDEAL FOR URBAN JOBSITES

The SV60 benefits from a very short rear overhang and a minimal front turning radius (only 2240 mm). Thanks to this unique design, this 5.6 t machine has a very compact working envelope of only 3565 mm. The SV60 is particularly suited for work in urban areas: no need to block the two lanes of traffic.

WORKING ENVELOPPE 360°

Diameter : 4480 mm (no offset) / 3680 mm (offset)

STABILITY

MAXIMUM STABILITY

AND EXCEPTIONAL LIFTING FORCES

The SV60 benefits from an undercarriage with a unique design which is associated with the use of a large counterweight and excellent weight distribution, in order to provide an unmatched stability for this weight class and remarkable lifting capacities. The SV60 carries loads of 1 ton up to 5.10 m at 1.25 m high.

UNIQUE UNDERCARRIAGE

The X-shaped box-section structure of the undercarriage provides excellent torsional stiffness. The frame is designed for maximum durability. All the components of the undercarriage have been designed to increase the durability and the service life of the machine and reduce its Total Cost of Ownership.

PERFORMANCE

Based on our unique experience and expertise, Yanmar technology ensures excellent performance while respecting the environment. The SV100-2 combines power, flexibility and precision. Its versatility makes it the ideal partner to improve your productivity, regardless of the work site complexity you are facing (earth moving, landscaping, grading, demolition...).

NEW GENERATION ELECTRONICALLY CONTROLLED YANMAR ENGINE

With an output of 33.4 kW at 2200 rpm, Yanmar's 4TNV84T-ZMBVA engine is the result of our continuous efforts to achieve technological advances in fuel consumption and emissions. With the SV60, Yanmar gives priority to the environment and to fuel savings :

- + An ECU manages the RPM according to the torque, optimizing the engine load. This enables to save fuel while increasing the productivity of the machines.
- + An Auto-Deceleration system (in standard) further reduces fuel consumption by enabling the engine to drop back to idle if the operator doesn't touch the operating levers for 4 seconds.
- + An Eco-Mode (in standard) effectively controls the motor speed which is reduced by 300 rpm, thus allowing a very low fuel consumption.

TRANSMISSION

The SV60 benefits also from a drive motor developing 10% more torque, improving cycle times and productivity, especially in levelling applications. Standard equipment also includes the new "automatic 2-speed" drive motors which shift automatically up and down depending upon the effort required. The operator is automatically provided with the best solution in terms of speed or pushing force, making operation easier and improving the operator comfort.

VIPPS HYDRAULIC SYSTEM (ViO PROGRESSIVE 3 PUMP SYSTEM)

The SV60 is equipped with a ViPPS (ViO Progressive 3 Pump System) hydraulic system. This hydraulic system main characteristic is the use of 4 hydraulic pumps, 2 variable displacement pumps and 2 gear pumps, (including one for joysticks) in order to deliver a total flow of as much as 139.4 l/min. To complete the system, Yanmar is using a control valve based on the ViPPS principle, which cumulates the flow of separate pumps in order to obtain the optimal combination in terms of speed, power, smoothness and balance. The ViPPS system allows smooth and simultaneous performance of all the operations, even while traveling in order to have the ultimate working tool.

EASE OF USE

ADJUSTABLE PROPORTIONAL CONTROL OF THE AUXILIARY CIRCUITS

Standard equipment of the SV60 includes an auxiliary hydraulic circuit. It is operated via a proportional control located on the joystick which adapt the flow and the direction of the oil flow. Additionally the circuit has an easy-to-operate potentiometer which adjusts the oil flow to the optimal requirement for each and every attachment.

- 1 Control of the 1st auxiliary hydraulic circuit
- 2 Flow adjustment via potentiometer of the 1st auxiliary circuit
- 3 Control of the 2nd auxiliary hydraulic circuit
- 4 Flow adjustment via potentiometer of the 2nd auxiliary circuit
- 5 Engine power controlled electronically by a potentiometer
- 6 Travel speed switch on the blade lever

SPACIOUS AND COMFORTABLE CABIN

VOLUME XXL

The volume of the cabin is comparable to the one of a 8t machine, offering up to 41 % more space compared to its main competitors. The large leg room enables the operator to be perfectly seated and to have the freedom of movement necessary to work efficiently and comfortably.

The travel pedals are foldable and have been designed for a perfect ergonomics.

CONTROL PANEL

Putting the operator in the center of its design initiatives, Yanmar developed the "Universal Design" concept : all controls are easily accessible and grouped on the right side of the operator.

- 1 Wipers
- 2 Lights switch
- 3 Eco-Mode
- 4 Auto-Deceleration system
- 5 Beacon light
- 6 Overload warning
- 7 Quick hitch

AIR CIRCULATION

The SV60 has an air-conditioning that can work at a pleasant temperature in extreme weather conditions. The 7 vents are placed to ensure a uniform temperature within the cabin and ensure a perfect window demisting.

The air filters are easily accessible for an improved maintenance.

AIR SUSPENSION SEAT

The SV60 is equipped in standard with an air suspended seat to offer an optimal comfort for a machine in this weight class. Fully adjustable and with a standard headrest, it reduces body tension and fatigue.

The roof window of the SV60 is protected by a fully integrated sunshade for a maximum comfort.

STORAGE SPACES

The SV60 offers many storage possibilities conveniently placed : cup and bottle holder, utility box, phone tray, document storage... and even one dedicated place for a lunchbox behind the seat ! The operator has all his personal effects within reach.

OPTIMAL SAFETY

The structure of the SV60 cabin has been designed to meet the ROPS (Roll-Over Protective Structure) certification as well as the FOPS (Falling Object Protective Structure) level 1. As an optional equipment, the SV60 can be equipped with a FOPS2 protection (front and top guard).

ALL-AROUND VISIBILITY

The SV60 design provides an ergonomic environment, excellent visibility and exceptional safety. The shape of the cabin gives the operator an optimal 360° visibility in order to improve the safety on the jobsite and to make work more efficient. The roof window offers a perfect visibility during loading and unloading operations

The SV60 is equipped with three mirrors to help the operator control the work area without moving from his seat.

REARVIEW CAMERA

The SV60 is equipped in standard with a rearview camera with a wide LCD 7" screen which ensures a perfect safety on the jobsites and an improved driving comfort to the operator. This camera is waterproof, offers night vision and has an integrated heating for a top durability. Easy to use, it offers many different settings, a mirror mode and even the possibility to connect a second side camera.

ACCESSIBILITY

The SV60 benefits from the largest cabin entrance in the market. This additional passage makes the entrance and the exit easier and improves significantly the operator's comfort and safety.

Entrance and exit are even more facilitated by 3 handrails ① ② ③ which are ideally designed and positioned to fit the operator's posture and grip position.

A large footstep with antislip system also upgrades the accessibility to the machine and the safety of the operator.

RELIABILITY

The SV60 has been developed in Europe, and uses only premium components. Quality and reliability are the main drivers of our product development.

The structure of the undercarriage, as well as the steel covers provide an optimal protection and longer service life. Furthermore, a lot of care has been paid to the hose routing on the working equipment. These measures enhance the service life and reduce downtime of the machine.

THE BEST BOOM AND ARM PROTECTION ON THE MARKET

The SV60 benefits from a unique and complete protection of all its boom and arm cylinders. All cylinder tubes and rods are protected by a spring type steel plate, which reduces drastically the Total Cost of Ownership of the machine.

DIGITAL INTERFACE

The SV60 is equipped with a digital interface which informs the operator in real time about the status of his machine. Perfectly integrated into the right hand console, the 3.3" screen provides excellent visibility. The interface provides the customer with useful information through LED lamps, or indications about important elements like fuel consumption, fuel gauge, coolant temperature gauge, etc... The interface assists the customer for maintenance intervals and to program such interventions. It also works as a diagnostic tool in case of malfunction by sending an error code and an information icon on the display.

MAINTENANCE

EASY ACCESS

Daily maintenance has to be performed easily. The engine hood has a wide opening, enabling an easy access to all major elements from the ground: air filter, compressor, battery, fuses and relays, fuel tank, hydraulic oil tank, engine oil dipstick...

LONG SERVICE INTERVALS

The SV60 is designed for working, and therefore its service intervals are reduced to a minimum.

EQUIPMENT

[STANDARD EQUIPMENT]

PERFORMANCE

4TNV84T Yanmar diesel | Direct Injection | Engine Control Unit (ECU) | Eco-Mode | Auto-Deceleration System | VIPPS Hydraulic system (ViO Progressive 3 Pump System) | 3rd hydraulic circuit to arm end with adjustable proportional control by potentiometer | Automatic 2nd speed | External hydraulic oil gauge | 1 LED light integrated into the boom

COMFORT

LCD interface | Adjustable and reclining seat with fabric covers, air suspension and headrest | Rearview camera with its associated screen | Heating | Adjustable wrist support | Foot rests | Wide travel pedals | Windshield with 2 fully retractable parts | Sliding double right side window | Transparent upper front part | Integrated sunshades | Wipers | Windshield washer | Automatic ceiling lamp | 2 x 12V outlets | Storage boxes

SAFETY AND DURABILITY

Handrails | Safety lever | Seat belt with retractor | Evacuation hammer | Anchor points | 3 mirrors | Horn | Blade cylinder supply hose into two parts | Complete protection of the cylinders (bucket, boom, arm and blade) | Hoses protected by abrasion resistant sleeves | Lockable covers | Electric refuelling pump

MISCELLANEOUS

Fuel gauge | Toolbox | Toolkit | Grease pump

[OPTIONAL EQUIPMENT]

EQUIPMENT AND PERFORMANCE

Steel crawlers | Pads for steel crawlers | Long arm (+290 mm) | Additional counterweight (+200 kg) | 4th hydraulic circuit with adjustable proportional control by potentiometer | Clamshell bucket circuit | Quick hitch line 150 bar | Quick couplers | Bio oil | 2 LED lights at the front of the cabin | 1 LED beacon fixed or with magnetic base | Kit 1 rear LED light + 1 beacon fixed | Improved fuel filtration

COMFORT AND EASE OF USE

Air conditioning | Adjustable and reclining seat with ski covers, air suspension and headrest | Seat Cover | Radio | Documentation box | Central greasing

SECURITY AND DURABILITY

Safety valves for lifting + overload warning | FOPS 2 protection (front + top guard) | Anti-theft device (key/keyboard) | GPS Tracking | Travel alarm | Removable battery cut-off switch

[ATTACHMENTS]

Yanmar gives you the attachment that fit your needs and match the safety standards in force in your country: mechanical quick coupler, hydraulic quick coupler, powertilt, standard, grading or symmetric buckets, hydraulic breaker, tiltrotators...

DIMENSIONS
